Duty Officer/Responder Name: Bonnie Hriczko	NRC Report #: 921573	Hotline Log DataID: 701509
Action Information		
<p>Description: 1014 hours the OSC contacted Con-Edison to get an update on the status of the spill. Spoke with Dave Duke from their environmental group who informed me that the spill of mineral oil/dielectric fluid is still ongoing. The estimated quantity is 4,600 gallons, but it continues to leak at a rate of 350-400 gallons per hour. The location is 196th Street and Cedric Ave. in the Bronx. There is a 10' pipe below ground at that location that has a leak. They believe that the oil is getting into the combined sewer system, which will ultimately reach the treatment plant. They have a boat deployed on the Harlem River to monitor for sheen in case any oil bypasses the sewer. They would like a representative of the NYC DEP on-scene to verify that the oil cannot leave the sewer system, so that they can release the boat.</p> <p>1051 hours the OSC contacted the NYC DEP to notify them of the incident and request that they respond to the spill location and assist Con-Edison with their spill response. I gave them all of the spill information and they assured me that a representative with respond shortly.</p> <p>1104 hours the OSC contacted Con-Edison back and assured them that a rep from the NYCDEP will be responding shortly. I notified him that a new duty officer would be taking over at noon and that he can contact him directly should he have any follow-up information or need assistance.</p> <p>1108 hours the OSC briefed the upcoming duty officer (Budroe).</p>
